

The logo for the Parkinson Study Group (PSG) features the letters 'PSG' in a bold, stylized font. The letters are filled with a pattern of vertical lines of varying thicknesses, creating a textured, grid-like appearance. The 'P' is on the left, followed by the 'S' and then the 'G' on the right.

## WHAT IS THE PARKINSON STUDY GROUP?

The Parkinson Study Group (PSG) is a non-profit group of physicians and other health care providers from medical centers in the United States, Canada and Puerto Rico experienced in the care of Parkinson patients and dedicated to clinical research of Parkinson disease (PD). The PSG was formed in 1986, prompted by the recognition that clinical research in PD required the participation of large numbers of research patients (participants) under the cooperative care of skilled and experienced research physicians.

## THE PSG ADVANTAGE: FOUR REASONS TO PARTNER WITH PSG

### Our Network

We are the longest standing, largest and most experienced network of committed and credentialed PD Centers for over 30 years! Our network comprises 145 credentialed PD Centers throughout North America. We take great pride in our strict credentialing process whereby only Clinical Trial Centers with substantial experience and expertise in the care of PD patients can be members of our network.

### Our Track Record

We have completed over 50 Parkinson clinical trials enrolling from 8 to 800+ participants, totaling more than 7,000 Parkinson patients. Our clinical trials have been instrumental in FDA approval of 4 Parkinson drugs: Rasagiline, Rotigotine, Entacapone and Pramipexole.

### Our Comprehensive Service & Flexibility

Sponsors can choose to partner with the PSG for the entire clinical trial life cycle from protocol creation to FDA application; or “cherry-pick” from the following services coupled to PSG trials:

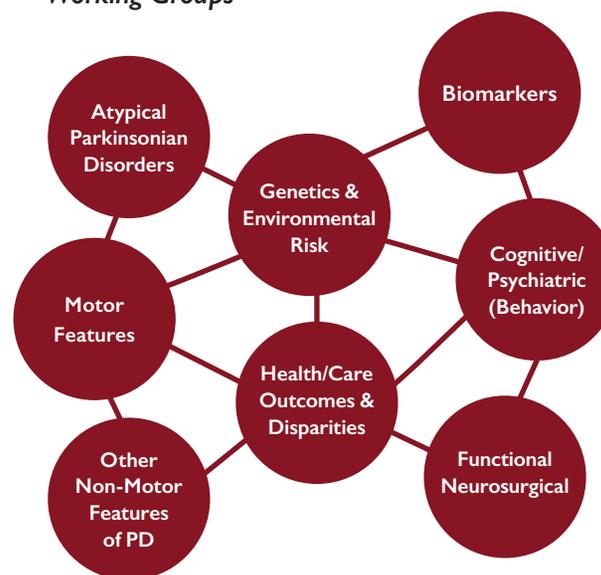

- Protocol creation/modification
- Project Management
- PSG Site Selection
- Clinical Monitoring
- Event planning for the Investigator’s Meeting
- Data Management

### Our Reputation

Above all else, the PSG is most known for the scientific rigor in the way it conducts its clinical trials and for the high quality of its publications, providing the greatest impact and longevity of drugs investigated. Our standing among PD stakeholders is reflected in our 300+ scientific publications and our contributions to successful FDA applications.

## OUR COMMITTEES

### Working Groups

*The primary goal of our Working Groups is to generate proposals for new research studies, either interventional or observational, as well as retrospective data mining projects.*

### Standing Committees

Study Budget
Credentials
Mentoring
Nominating
Publications
Scientific Review

# PSG

## MISSION

To advance knowledge about the cause(s), pathogenesis and clinical impact of Parkinson disease and related disorders and to develop and implement scientific strategies to examine promising therapeutic interventions.

## VISION

To make substantial advances in our understanding and treatment of Parkinson disease and other parkinsonian disorders, as an efficient, collaborative network of talented clinicians and scientists, operating under a supportive and proactive leadership with broad backing from government, industry, foundation and patient stake-holders in the Parkinson community.
