

## PSG Data Sharing Resources

### **I. Available studies through a secure server at the University of Rochester**

1. CALM-PD
2. RAPID
3. ROADS
4. TEMPO
5. PRESTO

These de-identified industry sponsored trials are accessible remotely through a virtual network. All analyses are to be performed on the network; the data cannot be downloaded. Access to the server will be granted after the submitted research proposal is approved by the PSG Scientific Review Committee. Proposals utilizing data from subjects randomized to the active treatment group of the TEMPO or PRESTO studies will also need approval of the sponsor before access will be granted and investigators will be required to have any potential publications or presentations reviewed and commented by the sponsor 60 days prior to submission.

### **II. PD-DOC studies**

1. DATATOP – first 2 years
2. ELLDOPA
3. PRECEPT
4. PRESTO – placebo group only
5. QE2
6. RAPID – placebo group only
7. TEMPO – placebo group only

The NINDS funded PD-DOC project at the University of Rochester has closed. The data from the completed clinical trials will continue to be available upon request. Those wishing to access these data are instructed to email the NINDS Clinical Research Liaison at [CRLiaison@ninds.nih.gov](mailto:CRLiaison@ninds.nih.gov)

### **III. DATATOP biospecimens housed at Indiana University**

1. DNA
2. CSF (baseline and endpoint)
3. Serum collected at time of lumbar puncture
4. Serum collected at various study visits
5. Urine collected at various study visits

Access to these biospecimens may be requested through a separate request for application (RFA) in collaboration with The Michael J. Fox Foundation.
